PROFILE

I am an undergraduate at the University of Moratuwa, specializing in Transport Management and Logistics Engineering, with a focus on supply chain management and logistics operations. Currently seeking an internship to apply my academic knowledge and skills in a practical setting. An adaptable team player, I excel under pressure while maintaining precision in my work. Driven by a relentless pursuit of goals, I thrive in collaborative environments and leverage strategic problem-solving to achieve success. My passion for optimizing logistics systems and solving real-world challenges positions me as a valuable addition to any team focused on operational efficiency and innovation.

EDUCATION

- **University of Moratuwa** 2022-2026
B.Sc Engineering Honours Moratuwa, Sri Lanka
 - Specialization: Transport Management and Logistics Engineering
 - Overall GPA: 3.45 out 4.0
 - Dean's List: Semester 4
- **CP/H Ginigathena Central College** 2011-2019
Secondary Education Ginigathena, Sri Lanka
 - G.C.E A/L : - Combined Mathematics : A - Physics : C - Chemistry : C - Z Score : 1.16

PROJECTS

- **Semester Project: [Warehouse Design (Ongoing)]**
 - Overview: Designed a comprehensive warehouse layout, covering all key aspects such as internal and external areas, dimensions, and drawings. Upgraded the warehouse into a smart facility by integrating Arduino-controlled forklifts and implementing advanced technologies to enhance operational efficiency.
 - Technologies: Arduino, Tinkercad, C ++
 - Key Areas: Basic Electronics, Designing
- **Semester Project: [Waste Collection System and Processing Centre (Dehiwala-Mount Lavinia Municipal Council)]**
 - Overview: Worked on the Waste Collection System and Processing Centre for Dehiwala-Mount Lavinia Municipal Council, identifying key challenges and optimizing processes. Applied engineering design theories and concepts to develop effective solutions, improving waste management efficiency and addressing critical system issues.
 - Key Areas: Conceptual Designs and Loops, Problem Identification Theories, Problem Solving and Analyzing Techniques
- **Semester Project: [Vegetable Supply Chain in Manin Market (Paliyagoda)]**
 - Overview: Analyzed and optimized the vegetable supply chain at Manning Market, Sri Lanka, by forecasting demand, streamlining delivery routes, and improving product categorization. Implemented data-driven strategies to reduce delays, minimize waste, and enhance the flow of goods from farmers to consumers, leading to improved operational efficiency.
 - Technologies: Power BI, Minitab
 - Key Areas: Operations Engineering, Economics, Principles of Supply Chain, Data Science
- **Semester Project: [SustainEdge SME Accelerator]**
 - Overview: Worked on the "SustainEdge SME Accelerator" project, focusing on advancing sustainability in the supply chain, logistics, and transport operations of Three Star Organic Farm (Pvt) Ltd, an SME in the agriculture sector based in Piliyandala, Colombo. The project aimed to foster innovation and sustainable practices, giving the SME a competitive edge through the accelerated adoption of eco-friendly solutions in their transport and logistics operations.
 - Key Areas: Biomimicry for Sustainable Designs, Industrial Ecology, Circular Economy, Sustainable Transport Systems
